

## Fallen (Part 2)

Mýa

After all this pain and stress I wish I would've never fallen  
In the arms of someone else is where I wish I would have fallen  
Look at all this mess you got me going through  
I wish I would've never fallen fallen for, fallen, fallen for you

Oh fallen was a mistake loving you is like a real bad headache  
I need some aspirin, Tylenol, extra strength to take this pain away  
Together we stood divided we fall and now my love is recalling  
I gotta take it back from you, I don't know what else to do

After all this pain and stress I wish I would've never fallen  
In the arms of someone else is where I wish I would have fallen  
Look at all this mess you got me going through  
I wish I would've never fallen fallen for, fallen, fallen for you

Oh and now you acting like you all that  
Somebody catch me 'cause I think I'm about to fall back  
Pause that, let me get myself together, that's better, baby  
I thought (I thought) you were the one for me  
And now my eyes can clearly see (can see)  
That we were never meant to be it was just a false reality

After all this pain and stress I wish I would've never fallen  
In the arms of someone else is where I wish I would have fallen  
Look at all this mess you got me going through  
I wish I would've never fallen fallen for, fallen, fallen for you

I fell and now I'm still fallen, out of love with you my darling  
Bout to my change my number so stop calling, stop calling  
'Cause I've fallen out of love with you my darling  
Stop calling, I've fallen out of love with you my darling, I've fallen, I've  
fallen

After all this pain and stress I wish I would've never fallen  
In the arms of someone else is where I wish I would have fallen  
Look at all this mess you got me going through  
I wish I would've never fallen fallen for, fallen, fallen for you

It's hard to say they call it a world what we're making it today  
So I'm a show you what these force can't clearly say  
I wake up early every morning, help you start your day  
I see you are better at your job, now put your tears away  
Don't let nobody let your smile or your years away  
Jealousy is natural, that's why we are here today  
At the top of the world, never fear of faith  
Now take a bath at your life, let roses swim incase  
Now you can twist and bend but I will never break  
When you are down and out prancing is the creme late  
When the lights are out you ask if I'm still awake  
Have you hide in the clouds with that civil  
This is deeper than the touch and the taste  
On my tongue but I guess it has to go to waste

After all this pain and stress I wish I would've never fallen  
In the arms of someone else is where I wish I would have fallen  
Look at all this mess you got me going through  
I wish I would've never fallen fallen for, fallen, fallen for you
