

Saving Face

Myles Kennedy

Heaven help the dreamer
Still dancing in the dark
For the only way you live is from the heart

Heaven help the seeker
Still reaching for the stars
Justified you still believe you're not that far

And though you shine
Where most would fade
You've crossed the line
Along the way

Saving face
It's not too late
Though times have changed
You will never be replaced
You will never be replaced

Don't second guess the first chance
It haunts you every time
Cause you got to seize the moment to get by

The curtain call will come someday
But baby dry your eyes
Cause the journey never ends so enjoy the ride

You're saving face
It's not too late
Though times have changed
You will never be replaced

Careful what you wish for you might get what you want
Things are never as they seem at all
Until you see
It was just a dream
Never meant to be
It was never real at all

And though you shine
Where most would fade
You've crossed the line
Along the way

You're saving face
It's not too late
Though times have changed
You will never be replaced
Don't be afraid
Pushed away
But you will never be replaced
No no
You will never be replaced
No no
You will never be replaced
