

# I Want to Die

Myrath

Pain in my mind  
Is turning so alive  
Those demons that breed in your eyes

I've just found out  
Inside our secret garden  
Morning love dew has turned to wicked tears

If your love was just a lie  
If you leave with no goodbye  
And throw away our love, our life, go over there  
If we cannot go back in time  
If we don't have a second try  
I take a last breath to say without you I will die

I wanna die  
Wanna scream my madness  
You left me behind  
With a million tears of sadness  
Night after night  
I grope for you but you're not here by my side

Come take my hand  
To rekindle the flame  
I'm not playing a game  
Against odds, against trends  
Let's write our future with our hands

I was always so  
Keen to give my all  
Every piece of my will  
Body and soul  
You know you can take it all

Fly me to the sun, I want to die  
Deep inside the flames, I say goodbye

I wanna die  
Wanna scream my madness  
You left me behind  
With a million tears of sadness  
Night after night  
I grope for you but you're not here by my side

[Solo]

Fly me to the sun, I want to die  
Deep inside the flames, I say goodbye

I wanna die  
Wanna scream my madness  
You left me behind  
With a million tears of sadness  
Night after night  
I grope for you but you're not here by my side
