

ESP

N*E*R*D

You got energy, but you ain't gonna use it
You got so much time, but you ain't gonna use it
You got so much space, but you ain't gonna use it
You got a great big mind, but you ain't gonna use it
You got synergy, but you ain't gonna use it
You got so much light, but you ain't gonna use it
You got such good taste, but you ain't tryna use it
Other side of your brain, but you ain't tryna use it
You got an extra eye, but you ain't tryna use it
Remember what you find coming from the losing

Walking around with the energy of the hot summers
Spread to go weird, and illuminated creatures
The evil incarnates, they wanna take it from us
But, I walk with a force that can penetrate the police
Hey, workers of mass destruction
Influence your patterns
The energy of a thousand suns
The energy in everyone

(The energy baby...)

You got energy, but you ain't gonna use it
You got so much time, but you ain't gonna use it
You got so much space, but you ain't gonna use it
You got a great big mind, but you ain't gonna use it
You got synergy, but you ain't gonna use it
You got so much light, but you ain't gonna use it
You got such good taste, but you ain't tryna use it
Other side of your brain, but you ain't tryna use it
You got an extra eye, but you ain't tryna use it
Remember what you find coming from the losing

Don't be surprised if the guilty is among us
Don't kill them, cut em', then you let them be
'Cause the enemy is humongous culture poachers
And it's gon' import us, my sister and the free
Hey, workers of mass destruction
Try to make you branded cattle
The energy of a thousand suns
(Now let them let you down 'cause you got the)
The energy in everyone (that's good)

The energy baby (in you)
The energy baby (in me)
The energy baby (you can't see)
The energy baby (just believe)

Energy, energy, energy...
(Believe...)

You know that you got it right when people ask, "Hey, what are you on?"
Well, this is the civic state that revolutions are born
Did you ever realize that universe just means one song
You're so used to doing it all alone you were dancing when you were born

Contemplating time and space

Light is raging then erase
How I stand in the same place?
Connect the million by the waist
ESPN with the mace
It come to me when I gaze
And when I listenin' to waste
My mind receive it then it plays

Forward, forward, forward, forward
But it takes you just to lay back, lay back, lay back
Lean forward, forward, forward, forward
I think it's really cool to lay back, lay back, lay back
Come on and lean forward, forward, forward, forward
They keep telling you to lay back, lay back, lay back
But you gotta lean forward, forward, forward, forward
They say come on man lay back, lay back, lay back

It's what possessed the slave to look in the river (shoo, shoo...)
The hate saw his true master, fuck is a mister? (He was always master, hey)
And sober is the only worthy system (shoo, shoo...)
And he's the co-creator with the giver

Detach yourself
Re-pack yourself
Be back yourself
And dream as yourself
Be seen as yourself
Beam as yourself
Scream as yourself
And be king of yourself

Contemplating time and space
Light is raging then erase
How I stand in the same place?
Connect the million by the waist
ESPN with the mace
It come to me when I gaze
And when I listenin' to waste
My mind receive it then it plays

Hittin' forward, forward, forward (believe, forward, forward)
Lean forward, forward, forward (believe, forward, forward)
Come on now lean forward, forward, forward (believe, forward, forward)
But you gotta lean forward, forward, forward (believe, forward, forward)
(Believe...)
