

Transition

Nabiha

Start the car and push it next to me
Getting ready for a new transition
Moving up to a new position
It's time

Leave the past, an innovation
Come with me to gain admission
Wrap it up, we're on a mission
It's time

And I can't help the way that I feel
Open scars, they hope it's so real
People cross in words that they're cool
But I feel

Wrap it up and flip it on you
Ready for a new transition
Wrap it up and flip it on you
Are you ready for a new transition?

Transition, transition
Are you ready for a new transition?
Transition, transition
Are you ready for a new transition?

Grab my heart and push ignition
Ready for a new transition
Look at life with a minor vision
It's time

And I can't help the way that I feel
Open scars, they hope it's so real
People cross in words that they're cool
But I feel

Wrap it up and flip it on you
Ready for a new transition
Wrap it up and flip it on you
Are you ready for a new transition?

Transition, transition
Are you ready for a new transition?
Transition, transition
Are you ready for a new transition?

Don't let them haters get you down
Just let them fade into the sound

Wrap it up and flip it on you
Ready for a new transition
Wrap it up and flip it on you
Are you ready for a new transition?

Transition, transition
Are you ready for a new transition?
Transition, transition
Are you ready for a new transition?
