

## Crowded Star

Nada Surf

I'm just trying to be, do you know what I mean?  
Every day is a teacher waiting to be seen  
Now and then I forget something I need to know  
Then I get it back, it comes and it goes

I was on my own  
On a crowded star  
Seeing people's forms  
But not how they are

I was ready for a change before you came  
I was looking for a way to not stay the same

It's like treasure now, every day by your light  
Don't know where it comes from, in the ground or the sky?  
Don't believe any reasons about why we arrived  
Just here for a while, our part of time

There will be new lows  
And new highs of suns  
The same infinity  
Around everyone

I was ready for a change before you came  
I was ready for a place out of the rain  
I was ready for a change before you came  
I was looking for a way to not stay the same

Coming in to land  
I had more than one chance  
I can't believe my luck  
I love how you dance

I was ready for a change before you came  
I was ready for a place out of the rain  
I was ready for a change before you came  
I was looking for a way to not stay the same

Coming in to land  
I had more than one chance  
I can't believe my luck  
I love how you dance
