

## Spaces

Nadhif Basalamah

The scent of your perfume  
It leads me back to you  
And now we're here it seems so clear  
Gotta keep my mindset on you baby no

You seem uncertain love  
Well let me try to do you my way  
Give it some time  
We'll be just fine  
Your heart is divine and glad I called it mine  
And then you'll know our love is bound to grow

Save me some space in your heart don't you go  
Save me some space in your heart don't you go  
Save me some space in your heart don't you go  
Save me some space in your heart don't you go  
And my world's crashing down if I can't be with u no more

Come and fly away with me  
And don't ever let me be alone  
Don't you know we're meant to be  
Your priceless smile is something else  
And nobody won't ever get the share

Save me some space in your heart don't you go  
Save me some space in your heart don't you go  
Save me some space in your heart don't you go  
Save me some space in your heart don't you go

Save me some space in your heart don't you go  
Save me some space in your heart don't you go  
Save me some space in your heart don't you go  
Save me some space in your heart don't you go
