

White Rabbit

Nadine Lustre

Upside down
Navigate me through this masquerade
When lights go out
Dreams they show me what I can't explain

Wake up and wake up
Windows and walkways
Somewhere I got lost
Wake up and wake up
Familiar faces
Hello can you help?
Maybe they know me
Better than I know myself

Can't control
The forward motion
Caught the current
Lost in the ocean
Paralyzed the fear leaves me frozen
Can't see beyond my emotion
Bright lights there's no end in sight
Runways paved in all eyes
They got me right where they like

Tell me what is real
Stop chasing bad habits
Tell me what is real
Follow the white rabbit

I'm stuck in a dream
They tell me what's real
My love is fading
Look around my castle started caving

Wake up and wake up
Windows & hallways
Somewhere I got lost
Wake up and wake up
Familiar faces
In my world, I am the queen
But even my own reflection keeps judging me

Can't control
The forward motion
Caught the current
Lost in the ocean
Paralyzed the fear leaves me frozen
Can't see beyond my emotion
Bright lights there's no end in sight
Runways paved in all eyes
They got me right where they like

We ain't going out like this
Us against the world we never doubt, don't miss
Switch off the lights
Feels like I'm alone on nights like this
Take flight like this

Letting yourself go has never been a question
Add a lil petrol to the fire, make your head spin
I'm a brand new phoenix
Life's got a brand meaning
Time for redeeming

I know you've been through many things
It's been a minute
Since you felt like you could spread your wings
And now you're in it

Hey there girl I know
You've been too busy crushing every obstacle
No time to take it slow

Tell me what is real
Stop chasing bad habits
Tell me what is real
Follow the white rabbit

Tell me what is real
Stop chasing bad habits
Tell me what is real
Follow the white rabbit
