

## Now I Have Everything

Nancy Sinatra

You saw what others couldn't see  
And loved the lonely part of me  
Now I have everything, now I have everything  
I know I used to be so strong  
I never thought I could be alone  
Now I have everything, now I have everything

I have your understanding  
Your love is all I need  
I was so far down and then you touched me  
My aching soul was freed

You saw what I was hiding, you didn't turn away  
You were there to stay  
You were there to stay

You never cared what people said  
You saw me with your heart instead  
Now I have everything, now I have everything

You never cared what people said  
You saw me with your heart instead  
Now I have everything, now I have everything  
With all the love you give  
Now I have everything
