

Antidote

Nao

She's got the good, good vibes
Beauty that I can't describe
Golden like the summer skies

Her shape or the skin don't crack
Brown sugar, she a chocolate snack
Fire girl, she don't take no flak
You take the sun with you when you leave the room

It's incredible, I put you on the pedestal
I mean, oh, you're magical
You are special
You changed my life, it's a miracle
I'm in love, you already know

'Cause you're my
You're my antidote-dote-dote-dote-dote-dote
You're my antidote-dote
'Cause you're my
You're my antidote-dote-dote-dote-dote-dote
You're my antidote-dote
'Cause I'm in love, you already know-know

Baby, I love to have ya
Take me from myself, you save me
You bring me life, you bring me joy
Lately, I've just been letting
Past life come and regress and take me

I pray for something more than just physical
Ooh, you're something spiritual
Ooh, we made a miracle, oh
I pray for something more than metaphysical
Ooh, you're something spiritual
Ooh, you've been my antidote-dote

'Cause you're my
You're my antidote-dote-dote-dote-dote-dote
You're my antidote-dote
'Cause you're my
You're my antidote-dote-dote-dote-dote-dote
You're my antidote-dote
'Cause I'm in love, you already know-know-know-know

The only one I'm thinking of, yeah
The cure, there's no one above you
'Cause I'm in love, you already know-know-know-know
The only one I'm thinking of, yeah
The cure, there's no one above you
'Cause I'm in love, you already know-know

You make me see things differently
You make me feel things differently, oh
I feel you deeper, deep in me
I feel your ener-energy

'Cause you're my

You're my antidote-dote-dote-dote-dote-dote
You're my antidote-dote
'Cause you're my
You're my antidote-dote-dote-dote-dote-dote
You're my antidote-dote

'Cause I'm in love, you already know-know-know-know
The only one I'm thinking of, yeah
The cure, there's no one above you
'Cause I'm in love, you already know-know-know-know
The only one I'm thinking of, yeah
The cure, there's no one above you
'Cause I'm in love, you already know-know
