

# Light Years

Nao

Our two worlds collided  
I saw pretty blue  
You saw something new  
I could barely hide it  
We were only friends  
Scared that it would end  
If our hearts united  
If we just confided uh  
Why would we deny it  
If we both decided that we would

Risk it all, take the fall  
To seize the skies, chase miracles  
Fuse our worlds in the universe  
Even if it hurts

Oh but gravity  
Won't let go of me  
I've waited light years  
I've waited light years  
For you  
For you  
For you  
If you and I could have it all  
Then I would wait a thousand years

Love revolves around you  
Steady like the moon never far apart  
Kiss the earth beneath you  
Watching as it grew even through the dark  
Even roses couldn't bloom without you baby  
And I don't know what I would do without you

Oh but gravity  
Won't let go of me  
I've waited light years  
I've waited light years  
For you  
For you  
For you  
If you and I could have it all  
Then I would wait a thousand years for you

(I could wait a thousand years)  
I could wait a thousand years to be with you wherever you are  
(I could wait ten thousand years)  
Hope you built that rocket ship cause I can't wait to rock it baby  
(I could wait a thousand years)  
I could wait a thousand years to be with you wherever you are  
(I could wait ten thousand years)  
And travel like the speed of light  
I'll hold on to these feelings for you

I would wait light years  
I would wait light years for you  
For you  
For you

If you and I could have it all  
Then I would wait a thousand years for you
