

The Only Love We Know

Naomi Sharon

There's no way back tonight, just distance
We fall for the time, it's our essence
The moments we chase fading faster
Still walking through flames for our pleasure

Tell me where we go from here
If all that we know is fear
If it's just the end that's near

That's the way the story goes
That's the way the story goes, that's the only love we know
That's the only love we know
That's the way the story goes, that's the only love we know
That's the way the story goes
That's the way the story goes, that's the only love we know
That's the only love we know

Do we know what is right without pressure?
All I got is pride to do it better
But this love is a lie
We can't hold together

Oh, tell me where we go from here
If all that we know is fear
If it's just the end that's near

Oh, that's the way the story goes
That's the way the story goes, that's the only love we know
That's the only love we know
That's the way the story goes, that's the only love we know
That's the way the story goes
That's the way the story goes, that's the only love we know
That's the only love we know

We know
We know
The only love we know
We know, we know
We know
The only love we know
The only love we know
The only love we know
