

# My Generation

Nas

My generation will make a change  
This generation will make a change  
(Yes we will)  
My generation will make a change  
This generation will make a change  
(Do You hear me now)  
My generation will make a change  
This generation will make a change  
(we bout to make a change)

Now mi love fi see the schoolas dem a graduate  
A study hard and save the party for the holidays  
Diplomatic with dem Diploma  
And them bound fi great  
Because dem nah pick up no matic and a perpetrate  
And then I love the energies whe dem a generate  
My Generation it so special it will make a change  
Because the elders sew the seed and it a germinate  
So anytime dem see the progress dem a celebrate  
Because we rising up despite of the economy  
And then a we a star the show like the astronomy  
And how we keep on breaking through is an anomaly  
Because we keep remaining true without apology  
The mission ha to carry through and finish properly  
Say Gambia to Guadeloupe Paris to Napoli  
Say Zambia to Honolulu back to Tripoli  
And everybody want a future living happily

Can you blame my generation, subjected gentrification,  
Depicting their frustrations over ill instrumentation  
Cause music is the way to convey to you what I'm facing,  
Placing my life in front of your eyes for your observation  
Now if you can't relate then maybe you are too complacent,  
Athletes today are scared to make Muhammad Ali statements  
Whats up with your motto?  
Will you lead? Will you follow?  
Improve your values  
Education is real power  
I reach em like Bono  
So get rid of your self sorrow  
Add some bravado  
Get wealthy likes Wells Fargo  
Its truth, that I am you  
And I am proof  
Surviving through  
We do what we gotta do  
Yo we could break the cycle let nobody lie to you  
Then maybe put our sons and our daughters in private school  
Cause there's a mission we gotta finish before we leave  
This generation is destined to do historic deeds.

uhh if you weather that storm  
Then that rain bring sun  
Been a long time comin  
I know change gone come

Man I gotta keep it movin to the beat of my drum  
Last night I set the future at the feet of my son  
But they thinkin that my generation gotta die young  
If we all come together then they cant divide one  
Don't worry bout it just be about it  
Got a message from god heaven too crowded  
But I say hey young world you've never looked betta  
And I heard change started with man in the mirror ughh  
This generation  
I'mma represent  
A generation led by a black president  
Now hows that for change  
Who knew that could change  
I don't even look at the flag the same hey ughhh  
So when you finish readin revelations  
Thank god for my generation
