

Heart

Nashville Cast

You've got a million shadows there babe
Dancing in your head, calling out your name
You've got the battles, you've got the scars
And oh babe, you've got heart

You've got the crack in the windshield view
You've got the curse of the full moon
Whatever way fate is gonna deal your cards
Well that's alright cause you've got heart

Fight and fire
Built to take a beating
But you gotta keep your head up higher
And wear it on your sleeve where everyone can see it

You've gotta light burning through the dark
But oh babe, you've got heart

They got the words to pull you down
Chains to keep you on the ground
But the truth is freedom ain't that far
You're halfway there if you got heart

Fight and fire
Built to take a beating
But you gotta keep your head up higher
And wear it on your sleeve where everyone can see it

You've gotta light burning through the dark
Oh babe, you've got heart

Fight and fire
Built to take a beating
But you gotta keep your head up higher
And wear it on your sleeve where everyone can see it

You've gotta light burning through the dark
Oh babe, you've got heart
It's everything I love about who you are
Oh babe, you got heart

You've got a million shadows there babe
Dancing in your head, calling out your name
You've got the battles, you've got the scars
And oh babe, you've got heart
