

She's a big top ten with bright spotlights
That woman sure knows how to shine
You almost can't believe your eyes
You can hardly wait to see the sight
She'll have you walkin that high wire
Jumpin through rings of fire
Give you a moment in the sun
Be careful not to fall in love

Cause that curtain falls
The lights go out
The show goes on
She leaves town
If you know whats good for you you'll just let her go
Or you'll end up next to me in her sideshow

I remember our last spotlight there
She wanted me to an no one else
Nowadays I play my part
Pay a dime you'll see my broken heart

Cause that curtain falls
The lights go out
The show goes on
She leaves town
If you know whats good for you you'll just let her go
Or you'll end up next to me in her sideshow

And if you know whats good for you you'll just let her go
Don't end up next to me in her sideshow
