

When You Came Along

Nashville Cast

Before you I was lost in the deep dark wood
Before you I was lost

But somehow you found me when no one could
You held me till the hurt was gone

You came along in the nick of time
Like a boat in a storm, like one star in the sky
Then everything changed, my world spun on
When you came along

You made love simple in the chaos of it all
In other ways, yeah you danced me down the hall
You let me know that it's okay to trip and fall
I fell for you

When you came along in the nick of time
Like a boat in a storm, one star in the sky
Then everything changed, my world spun on
When you came along
When you came along
