

# Refugees From The Future

Našrot

We are the dirty bastards  
Children of the filth  
We came from the future  
Ruined by your guild

No fear, we're not soldiers  
We only want to know  
Who are the fuckin' assholes  
Who raised gain over the law

They spoke about people  
And the only one right way  
About the bright future  
So - now here we stay

Society was destroyed  
Only for their greed  
There remained a void  
That's all what we feel

Poison land bred poison sons, so look in our eyes  
And be sure we don't like you and you will not like us

'Cause we, we never heard such terrible lies  
When we've seen the earth, how it's dying

We are the dirty bastards  
Children of the filth  
Of your bad decisions  
And of your stupid sins

The future is dark and cruel  
We will stay with you  
We will be your mirrors  
The mirrors of shame and doom

Poison land bred poison sons, so look in our eyes  
And be sure we don't like you and you will not like us

'Cause we, we never heard such terrible lies  
When we've seen the earth, how it's dying

Mother Earth, polluted ground  
And dead seas all around  
Mother Earth, arid with no bound  
Only strange, unpleasand sounds

We sink in a wild river  
And a hundred, hundred stones  
Wound our bodies  
And break our bones

The legacy of your time  
And your conceited pride  
Pursue us again  
As a neverending crime

'Cause we, we never heard such terrible lies  
When we've seen the earth, how it's dying...
