

## Rockets with a message

Nasty

fire on children can you see them explode  
terrorizing air attacks but you've done nothing wrong  
they're marking rockets with a message to you  
hell is waiting  
it's money and power, religion fake honour bringing the death  
living life in fear

this goes out to you fucks  
killing for profit, killing for money  
or just cause you're fucking dumb  
in the name of your gods  
your false beliefs  
sitting on your thrones  
you gonna burn with the devil

raining bombs on their heads  
filling bodies full of lead  
no warning from above  
say goodbye to the ones you love  
living life in fear  
feel the bullets fly near  
nowhere to run

nowhere to run  
you will never grow old  
filling streets with death  
hear the buildings explode  
raining bombs on their heads  
filling bodies full of lead  
no warning from above  
say goodbye to the ones you love

scarfaced kid the guys got a hit  
the barrel spits fire like music in hell

the ground filled with blood and guts  
as the pavement turns red  
show them what they've done  
bring out your dead
