

For A Reason

Natalie Taylor

I wasn't looking when I found you
Spent two months thinking about you
Talked all night I knew I had to
Make you mine

Cause how perfect
To meet just the way that we did
To have it play out the way it went
For love not to work before it did, it did

That's why you said
This all happened for a reason
This all happened for a reason
This all happened for a reason
For a reason

I never looked back once I saw you
Still can't go a day without you
I'd never change the things we went through
To make this life

Cause how perfect
To meet just the way that we did
To have it play out the way it went
For love not to work before it did, it did

That's why you said
This all happened for a reason
This all happened for a reason
This all happened for a reason
For a reason

Every second, every minute
Everything that happened
It lead me right to you
It lead me right to you

Every mile, every mistake
Every time my heart changed
It lead me right to you
It lead me right to meet just the way that we did
To have it play out the way it went
For love not to work before it did, it did

That's why you said
This all happened for a reason
This all happened for a reason
This all happened for a reason
For a reason
