

Everything Changes

Natasha Bedingfield

Be careful what you love
'Cause that's what you could lose
You never had enough
It's all you want to use.

Before I saw your face nothing made me cry
And if you never live, you're not afraid to die
Now I'm trusting you to drive, steady on the road
Not sleeping at the wheel, going not too fast or slow
Everybody knows...

Chorus:

Everything changes in my life
Everything changes day and night
Everything's crazy now, but you're still there
You make me feel alive.
Everything changes in my life
Everything changes day and night
Not much is forever, but I wouldn't mind if you were.

Every time I wake and find that you're still there
All of my mistakes and even then you care
I blew up in concrete with shadows as my life
And not expect this dream
I'm yours and you are mine
Everybody knows...

Chorus:

When everything changes in your life
Everything changes day and night
Everything's crazy now, but if you're there
Will make it that alright.
Everything changes in my life
Everything changes day and night
Not much is forever, but I wouldn't mind if you were.

Now just move in kingdom's shake
Tight keep fine stunt like faith
As long as one thing's there always
I'll feel it up, girl you're there.
When everything changes you will remain
Oh yeah yeah

Chorus:

Everything changes in my life
Everything changes day and night
Everything's crazy now, but you're still there
You make me feel alive.
Everything changes in my life
Everything changes day and night
Not much is forever, but I wouldn't mind if you were.
Oh not much is forever, but I wouldn't mind if you were
