

Perfect Storm

Nathan Evans

We've come a long long way together me and you
Remember when I used to walk you home from school
And I tried to catch your eye across the classroom
To make you laugh I'd always play the fool
And through all these days it was still the same
And my love for you will never change

And when the waves come crushing down around me
When I'm with you they can do no harm
And when the dark clouds gather up above me
We're gonna make it through this perfect storm
This perfect storm, this perfect storm

Drinking whisky from the bottle after hours
And now we're laying in the grass watching the stars
And think of all the times I've held you in my arms
And now we're dancing where the band played "Chasing Cars"
And through all these days it was still the same
And now my love for you will never change

And when the waves come crushing down around me
When I'm with you they can do no harm
And when the dark clouds gather up above me
We're gonna make it through this perfect storm
This perfect storm, this perfect storm
Perfect storm, this perfect storm

We've come a long long way together me and you
Remember when I used to walk you home from school
And think of all the times I've held you in my arms
And now we're dancing where the band played "Chasing Cars"

And when the waves come crushing down around me
When I'm with you they can do no harm
And when the dark clouds gather up above me
We're gonna make it through this perfect storm

And when the waves come crushing down around me
When I'm with you they can do no harm
And when the dark clouds gather up above me
We're gonna make it through this perfect storm
This perfect storm, this perfect storm
Perfect storm, this perfect storm...
This perfect storm
