

You hide away all the tears but
I see it in your eyes
Take cover under your make up
But something isn't right
Not gonna sit here in silence
Might say something wrong
And I know that you have been fighting
But you gotta let it go

It will be easier in the morning
One day the pain will wash away

This one's for ya broken heart
Who's hiding underneath your scars
I know that you're hurting
But don't hurt all alone
Also got a taped up heart
Know how it feels to fall apart
So now, when you're hurting
Don't hurt all alone

I know you know that for each day
You'll see the reason why
But for now just know you don't have to
Carry all the weight
I promise it will get better
It just wasn't right
Not meant to be forever
You gotta let it go

It will be easier in the morning
One day the pain will wash away

This one's for ya broken heart
Who's hiding underneath your scars
I know that you're hurting
But don't hurt all alone
Also got a taped up heart
Know how it feels to fall apart
So now, when you're hurting
Don't hurt all alone...
