I just poured a 4 in a Fanta, I feel like it's the perfect potion  
Get geeked stay up all night, I work like I'm tryna get a promotion  
I made a lot of mistakes and all my business out in the open  
I made some permanent decisions off temporary emotions

Try to stay high all the time (All the time)  
Everyday I get loaded (All the time)  
Everyday I get loaded (All the time)  
Everyday I get loaded  
All it took was a little time  
Then all of my pockets exploded  
All of my pockets exploded  
All of my pockets exploded  
Anytime I go outside, I'm getting money so I show it  
I'm getting money so I show it  
I'm getting money so I show it  
I've been ignoring the signs  
I live the wrong way and I know it (Know it)  
I live the wrong way and I know it (What)  
I live the wrong way and I know it

Pass that shit I'm staying up, I put another half in my double cup  
Get high like I'm partying but my demons the only ones showing up  
I'm so fried give myself a hug, I don't need no one to show me love  
Wake up and I'm coming down, I start my morning by throwing up  
I could show you how to turn nothing into something (Something)  
She touching on my face and I don't feel nothing (Nothing)  
Making song after song she gone stay in the studio all night for the kid  
I be praying to God it ain't serious when I feel pain inside of my ribs
