

Front Lines

Navy Blue

Your love blinds me
Uh
Yeah

My eyes see, my love leads, my heart bleeds
When it write, on with the fight
I get stronger, it might take until December divide
Your heart blinds me behind me
Godly, my precious angels
Coventry, I'm on a leash sliver subdue
Justify release it's called perspective
David chiseled at defeat
Michelangelo, damage homes, cold street
Hot blocks, square meet
Hopscotch, I spun webs and got caught
Release, repeat until the time stop
What's time when your mind gone?
Don't matter, one time for the right ones
Left out, head down, my prayers up
Chill winds, the cuss pit again, crimson the moon
Navy new balance, who challenged me to a duel?
Dual swords, they never dull
Choose yours, I choose wisely
And get rewarded in this life
Eternalized through newer life, it takes timing
I'm wearing closure, bearing all the strive

When you get a civilization that says you don't owe anything to anybody
You don't have to give anything back and you're not from there
You're not descending from Iraq, you know, you're just descending from Abraham
Then what happens is
The people then, they're fleeing
That's a way of doing flight
They may be standing perfectly still
But they're culturally there fleeing because they're pushing the Earth away
from them at the speed of light
And so all of the inventions that are made to give comfort in order to assuage
the pain of the grief of the loss of that 'cause the soul just loves being
connected to all those things
And it doesn't like what's going on and so you really feel pain and that pain
is depression and that depression is medicated or people buy a boat and go
through this or they go through that or in the vacation
And then, it falls short of that and then they kill themselves or they don't
it's all nonsense
The idea is that you shouldn't be fleeing in the first place but stay with it
And try to learn what you can give and be a small being
So civilization makes it really easy for you to flee
But uh, staying in a place in order to give a gift to the holy in nature is
that calling
It's not hard but you actually have to do it
You can't, like, hope it happens to you
You know, like, it's not going to fall out the sky, you know, it's not programmed,
it can't be done
Can't just go to a workshop and get it, you know
It's not a mining situation 'cause everything in modern culture is mined where

ther you like it or not
I mean, agriculture is mining
Going and getting what you want is mining
Everything is mining
And so don't stop mining
And start making something live
Start making beauty [?]
