Light My Way

Locked in a shadow Praying for release You found my prison Your love was the key So come on, light myday And come on, light my way

Lonely's just a word now Something from my past Horizon's look brighter Loving you will last So come on, light my day And come on, light my way

The world's now my oyster Had me marked "reject" You changed the story Gave me back respect So come on, light my day And come on, light my way Nazareth
