[illegible]

This feeling right now so good so high
I don't want to wake up, I wish time would stop right now
Deepen your heart a bit more and listen
The moment you can see your dreams
My free rhythm (baby turn it on)
My feeling is getting lifted (baby turn it up)
I can feel your dream through this rhythm
This music loud

I go crazy to the music flowing out
I naturally feel the fastening beat
If you run out of breath close your eyes and rest for a moment
We're more than sufficient, stay up all night again

Yeah yeah listen listen concentrate
Push away your other thoughts
Take all my woken up senses as they are
Oh no my body rejects gravity go on
Oh but I'm still lacking

I don't wanna feel nothing
I don't wanna feel nothing
I don't wanna feel nothing
I don't wanna feel nothing
I don't wanna feel nothing
I don't wanna feel nothing
I don't wanna feel nothing
I don't wanna feel nothing

This feeling right now so good so high
I don't want to wake up, I wish time would stop right now
Deepen your heart a bit more and listen
The moment you can see your dreams
My free rhythm (baby turn it on)
My feeling is getting lifted (baby turn it up)
I can feel your dream through this rhythm
This music loud

The cheers that are exploding out of my mouth
The emotions filling from my head to my toes
Spitting out words can't control my expression
In front of my eyes, greeting a new
