Fireflies

NCT

Tell me bout your dreaming
I believe I was there too
I could sense your breathing
Lying in a different room
Cuz laws of the universe
Always there to observe
You shimmer
Your inner compass is taking you there
I'll be your beacon illuminate
While you on your way
Girl, I've been there too

Don't be afraid tonight, afraid tonight
Just know you never be lonely
I know it's hard sometimes to see the light
But you and I keep on dreaming
(Come on)

We gon' light it up
Light it up now darling
We can make the stars align
We gon' light it up
Light it up now we sparkling
Brighter than the fireflies

Think it then believe it
And truth'll find its way
I know that you'll see it
If you come with me
(Alright, alright, hey)

Show you what it's all about
Now we're gonna go all out
Don't gotta sing the blues
If you ever need me shout
I'll always be around
Girl, I've been there too

Don't be afraid tonight, afraid tonight
Just know you never be lonely
I know it's hard sometimes to see the light
But you and I keep on dreaming

We gon' light it up
Light it up now darling
We can make the stars align
We gon' light it up
Light it up now we sparkling
Brighter than the fireflies

We gonna light it up
Look how we shining now
You know it's only love
Brighter than the fireflies

Light it up, light it up
Like it's the first day of our lives

Fireflies, fireflies
They see us dancing in the sky

We gon' light it up
Light it up now darling
We can make the stars align
We gon' light it up
Light it up now we sparkling
Brighter than the fireflies
(Keep shining)

We gonna light it up
Look how we shining now
You know it's only love
Brighter than the fireflies
Fireflies
