I believe in miracles
Energy like that
Something more than physical
So gimme that
We can just grow that, grow that
We ain't gotta hold back, hold back, girl
I believe in miracles

It's a dream, but everybody call it life (Call it life)
Love to watch all the stars when they align (Yeah, that's right)
Come alive, I don't ever take a night off
I can see it even when I shut my eyes
Okay, now

Blinded to the revelation (I see you)
Universal conversations (I need you)
This revolution, it's so divine
Feel a shift in the body, in the soul, and the mind, yeah

I don't believe in time
Tell 'em the reason why
Resonance and empathy
Infinite in design

Empathizing with people
Don't care what difference, we equal
We come together when the record hit the needle
Oh, yah, yah

No, it ain't hard
We don't gotta fight back
Listen to the stars, yeah
We on the right track
Going all night, all night (Let's go)

Human nature innovator if you feeling it too
Really I just wanna reach tryna feel alive
All the love and the peace
