

What If

Ne-Yo

Last night your name came up in conversation
They were telling me you'd found love in a new location
And I swear my mind went to the time when you and I got faded
And I promised you we'd make it
Fast forward two years and we were over
Ubered to the airport when I know I shoulda drove ya
Later on I'd tell myself that breaking up was worth it
But deep down I'm still uncertain

What if, if we never let it go
What if, we were way too young to know
What it was, us just chilling like before
Tell me, wasn't that enough?
What if, if you never left that night
What if, I never let you board that flight
What if you, if you could only read my mind
Maybe we'd still be in love

Last night your name came up in conversation
Everybody singing his praises
This great new dude you dating
And I'm over you but I had a few
So it's probably true, I was faded (probably true, I was faded)
But damn it, I just could not take it (I just could not take it, oh)
I remember things were so good when you were with me
But then I went and broke your heart so bad you moved up out the city
No hating, I'm so glad that you're so happy now
But I wonder, do you ever think about

What if, if we never let it go
What if, we were way too young to know
What it was, us just chilling like before
Tell me, wasn't that enough?
What if, if you never left that night
What if, I never let you board that flight
What if you, if you could only read my mind
Maybe we'd still be in love

What if, ooh we never let it go
What if, we were just too young to know
What it was, just chilling like before
Wasn't that enough? Hey, yeah
What if, if you never left that night (never left that night)
What if, I never let you board that flight
What if you (you, you, you), if you could only read my mind
Maybe we'd still be in love
