Fire

Needtobreathe

If you need it, come let me know
If you want it, please let it show
I can see you, out for the night
I will take it with my life

I'm on fire, fire
I'm on fire, fire

Take a fall for all your men
There's a God of consequence
You can see my clouds at night
I will burn it with my life

I'm on fire, fire
I'm on fire, fire

Take a fall for what you know
Throw away all consequence
I can see your clouds at night
You were burning with love

Now that you want
I'm gonna give you something to hold
And now that you need
I'm gonna take it, take it please
