I Feel You

Neil Diamond

When the stars go down
And nobody else is around
I feel you, I feel you

As I look in your eyes
Suddenly I realize, how you heal me
You heal me

My way of giving back
All that you've given me
Is share my life with you
So it will always be

When we're far apart,
I can reach way down deep in my heart
And I feel you
If the night is cold
And I need someone that I can hold
I feel you

My way of giving back
All you've given me
Is share my life with you
So it will always be, oh yeah
I feel you, I feel you
And if you ever wonder
Someone right here
Will understand how you feel

When the lights are low
And I'm looking for somewhere to go
I feel you, I feel you
What I seem to know
Is the feeling wherever I go
That you feel me

Hey, I feel you
I feel you
