

# I Know Different

Neil Finn

You think everyone is a basket case  
Except for us maybe we're okay  
But sometimes you worry about me  
Just staring out to sea  
Like I know different

Now the old man's gone out to find some peace  
With the wild lions on the beach  
You don't have to go so far  
It's happening where you are  
We're no different  
On the inside, there's a rhythmic tide  
That pushes darkness out and shows him light  
Angel maker

See, learn, tame nature

A silhouette, against the ocean spray  
An image that he'll take away  
He won't ever forget it

Now it's on your mind you could use some help  
Stood his ground only hurt himself  
But you know he went through hell  
Casting all the swell  
Always distant, on the inside, with no ship in sight  
And every rhythm flows into the night  
Angel maker

See, learn, tame nature

A silhouette, against the ocean spray  
An image that he'll take away  
He won't ever forget it

One day, when it's over  
All the borders will be open  
In your honor, for your virtue  
I never, meant to hurt you  
I surrender, to the future  
But I won't be, taken prisoner  
And I'll stay with you, if you'll let me  
And the whole world, can forget me  
I know that, we came closer  
To believing, that we're through

I know different
