

Flame

Neil Sedaka

Spread it around, there's a fire in town
And you'd better come quick 'fore it all burns down.

She's real hot stuff and people tend to leave her alone,
Her name is Flame and she burns to the marrow in your bones.
There's a big bonfire in my heart and I can't put it out,
Listen here mister I just wanna warn you about
My girl Flame.

She's a five alarm lover and the darlin' of the fire patrol.
She gets a good clean start but it's hard to keep her under control.
She kindles a good deal of whispers from bedrooms to bars,
I'll love her for the rest of my life though I carry the scars
Of my girl Flame.

Spread it around, there's a fire in town
And you'd better come quick 'fore it all burns down.
She kindles a good deal of whispers from bedrooms to bars,
I'll love her for the rest of my life though I carry the scars
Of my girl Flame.

Spread it around, there's a fire in town
And you'd better come quick 'fore it all burns down.
Spread it around, there's a fire in town
And you'd better come quick 'fore it all burns down.
Spread it around, there's a fire in town
And you'd better come quick 'fore it all burns down.
