

Tumblin' Thru the Years

Neil Young

Well, I was walking down the road one step at a time heading home

I was thinking 'bout the love we shared, you and me

It's a complicated thing, this life

If I wasn't here with you

Tumbling through the years without our love

Many days and many nights fly by as we go on our way

And we have our old friends and new by our side

It's a complicated thing, in our hearts

There's a place that they can find

Tumbling through the years without our love

On the road ahead, my friend, our love is the guide we need

It takes us all the way back home to the light

It's a complicated thing, this life

If I wasn't here with you

Tumbling through the years without our love

Tumbling through the years without our love

Tumbling through the years without our love

Tumbling through the years without our love
