

# Supernovas (Exploding in Space)

Nekrogoblikon

All I need to do  
Is everything I never do  
Nothing's the same as  
The shit from before  
One more second  
I gotta stay alive  
Another lifetime  
In the hole, that's fine  
I got nothing to live for  
But who wants to die  
Are you ready to die?  
No, we'd like to stay alive  
We'd rather wait while we survive

You will listen to me  
We will never be free  
I'm not manipulating you  
I'm a powerful force  
I'm a man on a horse  
You're a child in a hole  
So please take a flyer

Still lookin'  
For the elusive  
What will make me happy  
Supernovas exploding  
In space  
And I'm stuck here  
Wasting away  
With the rest of my race

Wasting away  
Rest of my race  
Always on earth  
Never in space  
Hard to find love  
Easy for hate  
This ain't a choice  
This is called fate

Hey now hey  
Here we go yet again  
This was harder when I had  
More friends  
There's something waiting  
Just around the bend  
Something you  
Could never mend  
So never mind  
Gonna do whatever  
While I take my time  
I guess I'm just excited to  
Die again

Who did you listen to  
What are we gonna do  
They're all manipulating you

You're a sample in a jar  
You're rockin' phish in the car  
And everybody says you've gone too far  
But we all wanna laugh

Still looking  
For the elusive  
What will make me happy  
Supernovas exploding  
In space  
And I'm stuck here  
Wasting away  
With the rest of my race

Will I ever repent  
I don't think so  
Probably not  
Nah  
Will I ever repent I don't think so  
Probably not  
Nah, nah, nah
