

Fight Or Flight

NERIAH

The truth is I told myself we got off on the wrong foot
'Cause I was just in a bad mood, that's why I needed a rain check

But deep down I knew that's becomin' my complex
Rules are don't let them close and please keep it painless

Don't ask me what to do, I'll just throw it back to you
And, baby, if I don't like the answer

I'll push you away to see if you stay
You comin' back with me or are you gonna leave?
When I go too far, will you fall apart?
If I say goodbye, are you fight or flight?

You told yourself you never should've met me
Do you hate that one friend that introduced us at that party?
'Cause deep down, you knew that you'd have to chase me
'Cause you know I don't trust guys that are nameless

I'll push you away to see if you stay
You comin' back with me or are you gonna leave?
When I go too far, will you fall apart?
If I say goodbye, are you fight or flight?

Close your eyes, pick a side
Let me know before we try
Are you fight or flight?
Close your eyes, lose your mind
Let me go before you lie
Are you fight or flight?

I'll push you away to see if you stay
You comin' back with me or are you gonna leave?
When I go too far, will you fall apart?
If I say goodbye, are you fight or flight?

Close your eyes, pick a side (Ah)
Let me know before we try
Are you fight or flight?
Close your eyes, lose your mind (Ah)
Let me go before you lie
Are you fight or flight?
