

Know You Better

NERIAH

If I could I'd meet you
I probably would
Along with all the things that you said you would do
But knew you never could
Wish my family never liked you
Yours thinks I misunderstood
There's no way to explain how we changed
It never will look good

So I'm bleeding down the road
There's something you should know

Sorry I said I wouldn't hurt you
I didn't think I'd ever need to
Now we're just two stone cold enemies
Strangers with bad memories
And I don't even miss you
You lied telling me that I knew you
Should have know that you would [?]
Didn't think you would ruin my life
But now I know you better
Now I know you better
Now I know you better
Now I know you better

How's life in the country?
You sent stuff I left in a box
I've only heard from you on my birthday
I sent a two word response

So I'm bleeding down the road
There's something you should know

Sorry I said I wouldn't hurt you
I didn't think I'd ever need to
Now we're just two stone cold enemies
Strangers with bad memories
And I don't even miss you
You lied telling me that I knew you
Should have know that you would [?]
Didn't think you would ruin my life
But now I know you better
Now I know you better
Now I know you better
Now I know you better

Sorry I said I wouldn't hurt you
I didn't think I'd ever need to
Now we're just two stone cold enemies
Strangers with bad memories
And I don't even miss you
You lied telling me that I knew you
Should have know that you would [?]
Didn't think you would ruin my life
But now I know you better
