

Me & U

NERIAH

If you wanted me to be happy
You shoulda left
God forbid another "sorry"
You're wasting your breath
Did we overcomplicate it?
Do you feel okay when you're alone?
Oh I haven't slept in days
'Cause I know that you haven't been home

You get mad at me for gettin' mad at you
You say please don't leave, I say I'm tryin' to

It will take you one hundred thousand hours
To become shiny and new
You won't get her on a silver platter
When she's on top of you
I know you don't give one fuck about it
'Cause you never do
That's why we turn, that's why we turn
To me and you

With me and you, it's all loose ends
Now you hate me, I'm sorry I fucked your friend
Now you love me and I go and do it again
Hurts you when we make up and I stay here, but I hate love
Know I'm toxic, not pretend
When I told you that I loved you, it was never the meds
Lovesick, when does it end?
You pull me back in close, we both hate bein' alone

It will take you one hundred thousand hours
To become shiny and new
You won't get her on a silver platter
When she's on top of you
It will take you one hundred thousand hours
To become shiny and new
You won't get her on a silver platter
When she's on top of you
I know you don't give one fuck about it
'Cause you never do
That's why we turn, that's why we turn
To me and you
