

Gravity

Nero

I feel I'm watching time just go to waste
I dream of you and me in a better place
Just like ribbons in an empty space
I'm listening to the sound I wish that you could follow

We'll be together for eternity
Let's sail out farther to it, you and me
The light, the darkness, always more to see
And I get pulled in by your gravity

And I get pulled in by your gravity

I feel like dreaming when I'm wide awake
I need to know how long this is gonna take
Don't want you to make the same mistake
I'm listening to the sound, I wish that you could follow

We'll be together for eternity
Let's sail out farther to it, you and me
The light, the darkness, always more to see
And I get pulled in by your gravity

And I get pulled in by your gravity

I feel it coming, but it goes away
I know you're hearing what I want to say
I'll leave the searching for another day
But all I really want to say is

We'll be together for eternity
Let's sail out farther to it, you and me
The light, the darkness, always more to see
And I get pulled in by your gravity

And I get pulled in by your gravity
