

Lullaby

Nero

Outside, out of sight
Riding on a wave we've talked about
Inside, dim the light
You can do to me what you want tonight

Take it slow, in control
All I have to do is follow
You are my lullaby
This was never meant for you and I
This was never meant for you and I
This was never meant for you

Outside, out of sight
Riding on a storm into the night
Inside, make it right
Running through a dream made of broken glass

Take it slow, in control
All I have to do is follow
You are my lullaby
This was never meant for you and I
This was never meant for you and I
This was never meant for you
This was never meant for you
