

On Mars With You

Nessly

I be there on Mars with you
I be there on Mars with you
I be there on Mars with you
Yeah

Aye, passed the surface, we lost service
Might return you past your curfew
Sip it slow if you feel nervous
When it's pink you know it's perfect
Want it private, close the curtains
I deep dive inside the cervix
Stuff them magnums in the Birkin
Live two lives like Tyler Durden
Thought I came from servin' dirty
Clear the cash 'cause I'm determined
Conversations out of space
Constellations in the wraith

I be there on Mars with you
I be there on Mars with you
I be there on Mars with you
Yeah

I be there on Mars with you
Just hit my phone when you're alone and things get hard with you
I be there on Mars with you
Chasing stars when I lay up in the dark with you
I know what you need girl, you could be my patient
I just copped the 458, gave it a facelift
Better rock the seatbelt when you in my spaceship
Come trust some my dope, and you'll be on vacation

Yeah, call up fire, reservation
Hit my phone with your location
Come and ride inside my spaceship
Count these bands and quit your day shift
Yeah, diamonds skatin' like kaskade
In the condo gettin' brain
Pull up, presidential motorcade
Whole block shut down like parade

And I be there on Mars with you
Just not myself when I'm not with you
I know your parents would not approve but
I found myself when I got lost with you

I be there on Mars with you
Just hit my phone when you're alone and things get hard with you
I be there on Mars with you
Chasing stars when I lay up in the dark with you
I know what you need girl, you could be my patient
I just copped the 458, gave it a facelift
Better rock the seatbelt when you in my spaceship
Come trust some my dope, and you'll be on vacation
