

# Big Love

Netta

If I had the morning stars I would give em to ya, yeah yeah  
If I could sing to stop the war I would do it for ya, yeah yeah

Defibrillate your heart and bring you back from the dead  
I'll be running down your dreams and put em back in your head  
You don't even understand the bout were fighting for, yeah yeah

All I got for you is big love, big love, big love  
All I got to be is big love, big love, big love

This world may crumble but I'm by your side  
With a big love, big love, big love

If you've been through a lock, I'd and tell your story  
You're not gunna scare me off cause I'm ready for it yeah yeah

I can see it when I call but I need you to stay  
Cause baby don't you know that none of us is ok  
Everybody needs a hand and I'm reaching for ya, yeah yeah

All I got for you is big love, big love, big love  
All I got to be is big love, big love, big love

This world may crumble but I'm by your side  
With a big love, big love, big love

This world may crumble but I'm by your side  
With a big love, big love, big love

All I got for you is big love, big love, big love  
All I got to be is big love, big love, big love
