

Bring The Noise

Neuroticfish

Haven't seen you for a while
Have I told you how I've been?
See you gained some verve and style
I've been lost in between

You bring the noise
I suffer from your voice
You bring the noise

Not that I would envy you
Not that I would care that much
We lived our lives as you do
Since we have been out of touch

You bring the noise
I suffer from your voice
You bring the noise

You bring the noise
And I don't know what else to do
You bring the noise
(x2)

You bring the noise
And I don't know what else to do
You bring the noise

You brought the noise into my life
Unleashed the chaos upon me
My only chance to survive
Release myself from dependency

You bring the noise
I suffer from your voice
You bring the noise

You bring the noise
And I don't know what else to do
You bring the noise
(x6)

You bring the noise
