

We Are Not Safe

Neuroticfish

We are not safe

I am sorry to interrupt your self-pity and disgust
For this is an illusion of a game we used to trust
It's rigged in your advantage, do you want me to explain?
You've always been a part of this and always will remain

We have to learn, we have to teach
We have to practice what we preach
We are never to be silent

We have to reach and not demand
Before this all gets out of hand
We are never to be silent

We have to listen and understand
This is what we represent
We are never to be silent
We are not safe
We have to see who we are
Don't hide behind our avatars
We are never to be silent
We are not safe

We are not safe
(x8)

Not sorry to confront your ignorant denial
Your self-assuring comfort zone, well it is on trial
To have a clear conscience, but look the other way
Is not really helping to keep misogynists at bay

We have to learn, we have to teach
We have to practice what we preach
We are never to be silent

We have to feel and have to care
We really need to start somewhere
We are never to be silent

We have to listen and understand
This is what we represent
We are never to be silent
We are not safe
We need to see who we are
And look behind our avatars
We are never to be silent
We are not safe

We have to listen and understand
This is what we represent
We are never to be silent
We are not safe
We need to see who we are
And look behind our avatars
We are never to be silent
We are not safe
