

# Starlight

## Neverending White Lights

Pictures of the way we used to be  
Are burning in my thoughts like gasoline  
The tears fill your eyes, but you won't change my mind

She said  
I understand, but you had your chance

You can take your picture back and I'll spend the night wishing  
You could never understand that we were much younger then

Starlight, and I've tried, no you can't put it back together th  
is time

Tearing down the walls inside of me  
And I will cut this cord just to watch it bleed  
A moment trapped in time, a photograph that lies

She said  
I hope you find yourself this time

You can take your picture back and I'll spend the night wishing  
You could never understand that we were much younger then

Starlight, and I've tried, no you can't put it back together th  
is time

You were the gift worth waiting for  
Now you're the ghost outside my door  
Now were the gift worth waiting for

This was our lives

Starlight, and I've tried, no you can't put it back together th  
is time
