

# Look What You've Done

Nevertheless

When we met I had a history of leaving  
I was young and changing with the season  
I'm not the one to stay around too long  
I like it short and sweet like a pop song

So committed to not make a commitment  
I settle down, you might as well forget it  
I was sure that I would never find her  
and I had, the past is a reminder

Then she came around  
I don't know, everything was different  
She broke me down, oh no

Look what you've done  
Look what you've done to me  
Look what you've done  
Look what you've done to me  
I take all the blame for this  
I wanted every kiss  
Look what you've done  
Look what you've done to me

All alone like I was on an island  
Just me and no one to confide in  
You came like a hurricane of somewhere  
Shaken up and now I can't recover

Now that you're here  
I know I don't want to lose you  
It's all so clear, oh yeah

Look what you've done  
Look what you've done to me  
Look what you've done  
Look what you've done to me  
I take all the blame for this  
I wanted every kiss  
Look what you've done  
Look what you've done

I have had my share of bad romances  
I'm sure you have had them too  
All my regrets have their purpose  
All of them have led me straight to you

Look what you've done  
Look what you've done to me  
Look what you've done  
Look what you've done to me  
I take all the blame for this  
I wanted every kiss  
Look what you've done  
Look what you've done

Look what you've done  
Look what you've done to me

Look what you've done  
Look what you've done to me  
I take all the blame for this  
I wanted every kiss  
Look what you've done, Look what you've done  
Look what you've done, Look what you've done  
Look what you've done  
Look what you've done to me
