

All Downhill from Here

New Found Glory

Your hiding somthing cause
Its burning through your eyes
I try to get it out
But all I hear from you are lies

And I can tell you're going through the motions
Figured you were acting out your part
Once again we're playing off emotion
Which one of us will burn untill the end

Catalyst you insist to pull me down
You contradict the fact that you
Still want me around
And its all downhill from here
And its all downhill from here

Your good intentions
Slowly turn to bitterness
Reoccurring episodes
With each and every kiss

And I can tell you're going through the motions
Figured you were acting out your part
Once again we're playing off emotion
Which one of us will burn untill the end

Catalyst you insist to pull me down
You contradict the fact that you
Still want me around
And its all downhill from here
And its all downhill from here

And I cant believe you pulled it off again
Or notice till it all sets in
You'll deny it till
You're at your bitter end

And I can tell you're going through the motions
Figured you were acting out your part
Once again we're playing off emotion
Which one of us will burn untill the end

Catalyst you insist to pull me down
You contradict the fact that you
Still want me around
And its all downhill from here
And its all downhill from here
(then you keep pulling me down)

Pulling me down (pulling me down)
You contradict the fact that you
Still want me around
And its all downhill from here
And its all downhill from here
