

# Boom Roasted

New Found Glory

You listen up!  
Don't let them make you feel you don't do enough  
They sit on thrones and throw stones  
While you're scraping for a buck  
Blood, sweat, and tears  
And you still give, then they want you to relate  
Do you think we're just numbers to manipulate?

I was a sucker for it all before  
I won't stand for it anymore  
The way the game is played, hot topics change  
They're righteous, but they never cared before this

You're just a soundtrack  
You're a soundtrack  
Making money off their sadness  
It's just wordplay  
For the right pay  
So sing along till your heart breaks

You listen up!  
I've been on calls with the fakest of the bunch  
So I know firsthand all the scams they think up  
Just to get you to click and to follow along  
But their clothes quickly change  
If it doesn't help their song

I was a sucker for it all before  
I won't stand for it anymore  
The way the game is played, hot topics change  
They're righteous, but they never cared before this

You're just a soundtrack  
You're a soundtrack  
Making money off their sadness  
It's just wordplay  
For the right pay  
So sing along till your heart breaks  
You're just a soundtrack

You're a soundtrack  
Making money off their sadness  
It's just wordplay  
For the right pay  
So sing along till your heart breaks

They won't be there when it all goes down  
Nowhere to be found  
You make me think you think I'm stupid

You're just a soundtrack  
You're a soundtrack  
Making money off their sadness  
It's just wordplay  
For the right pay  
So sing along till your heart breaks  
So sing along till your heart breaks

So sing along till your heart breaks
