

## December's Here

New Found Glory

December's here, December's here  
December's here, December's here

I've been cooped up for the last 8 months  
Bogged down, living in a real ghost town  
There's a hope left inside of me  
I see the colors turning red and green  
So I know now  
The days are just counting down

I'm gonna watch Home Alone about a thousand times  
I could close my eyes and recite the lines  
You know this is my favorite time  
December's here  
December's here, December's here

I guess I'm a sucker for the sentiment  
Call it silly, I like living up the full moment  
There's a joy lit inside of me  
When the colors turn red and green  
You never know now, when our time's running out

So I'll rewatch Elf about a thousand times  
I could close my eyes and recite the lines  
You know this is my favorite time  
December's here  
December's here, December's here

I'm gonna eat everything that's put in my sight  
I'm gonna hang every strand that I find of lights  
This is my favorite time  
December's here  
December's here, December's here  
December's here  
December's here, December's here

There's a joy lit inside of me  
When the colors turn red and green  
You never know now, when your time's running out

Christmas Vacation a million times  
I could close my eyes and recite the lines  
This is my favorite time  
December's here  
December's here, December's here

I'm gonna eat everything that's put in my sight  
I'm gonna hang every strand that I find of lights  
This is my favorite time  
December's here  
December's here, December's here  
December's here  
December's here, December's here  
December's here  
December, December  
December's here
