

First Bite

New Found Glory

Whatever happened to forgive and forget?
I can admit that I'm a letdown, mostly out of step now
I can't move on until I fully admit
That the ship that I ran aground will never come back around

It's foolish for me to think it's for the best
With one hand on my mouth and the other ripping out my chest
We started over but you'll never forget
I was the first and I was sleeping in our...

Past tense, I can't think about it all night
You could eat me up with the taste of the first bite
Past tense, I can't think about it all night
I would rather wake up alone than be with you tonight

I'll never learn to shut my mouth and move on
I will admit to my mistakes now forget about common ground
I started over but I'll never forget
I was the first now I'm sleeping in her... not your...

Past tense, I can't think about it all night
You could eat me up with the taste of the first bite
Past tense, I can't think about it all night
I would rather wake up alone than be with you tonight
Be with you tonight

Past tense, I can't think about it all night
I would rather wake up alone than be with you tonight

Hold on, I regret
Folding in the heat of the moment
There's no way to go back
The knife you turned can't heal, you know that

Hold on, I regret
Folding in the heat of the moment
There's no way to go back
The knife you turned can't heal, you know that

It only hurts cause I let it,
You use the past as a weapon
And now I'm sleeping in our bed

Past tense, I can't think about it all night
You could eat me up with the taste of the first bite
Past tense, I can't think about it all night
I would rather wake up alone than be with you tonight
Be with you tonight

Past tense, I can't think about it all night
